ENGINEERED FOR EXCELLENCE
Electrotechnology

NZ CERTIFICATE IN ELECTROTECHNOLOGY

CERTIFICATE

LEVEL 3

This course is for learners wanting to enter the electrotechnology, or electronic security or radio industries. It is an intermediate step to the Level 4 Customer Premises Systems, or the Level 4 New Zealand Certificate in Electronic Security.

**18 months
Part time**

APPLY ONLINE
etec.ac.nz

e-tec

On completion the learners will be able to install and maintain networks and systems or service and repair a diverse range of end-user appliances, goods and/or equipment at a non-complex level.

There are 2 programmes to choose from and 2 strand options for each programme:

- The Electrotechnology programme, with an Installation or Service strand
- The Electronic Security programme, with an Installation or Service strand

COURSE OUTCOME

Graduates of the Installation strand will be awarded the New Zealand Certificate in Electrotechnology (Level 3).

Future pathways

Once you have successfully obtained your New Zealand Certificate in Electrotechnology (Level 3) there are many career pathways.

– NZC Electronic Security Level 4
– NZC in Customer Premises Systems Level 4
